*Election/Restrictions*

This application contains claim groups directed to the following patentably distinct species of the claimed invention:

Group	Invention
I.	Claims 1-21 drawn to a computerized ESD circuit design system with low and higher electronic components, growable and non-growable segments and circuit schematic module creating ESD elements, without layout/graphical format
II.	Claims 22-30 drawn to a method of forming an ESD protection design with user input of variable set, output higher order ESD protection circuit in one of circuit layout and circuit schematic graphical format, without growable and non-growable segments.
III.	Claim 31 drawn to a computer program product with components to: verify connection, verify width, via number, provide multiple lines, provide ESD ballasting, pulse width, surrounding insulator material, metal level, and distance, fill shapes, cheesing, without growable and non-growable segments, without schematic module/graphical format.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 2825

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Applicant is advised that cancellation of non-elected claims is required.
